

Netflix Content Analysis Dashboard

Project Overview

This project is an interactive Netflix Content Analysis Dashboard created using Microsoft Power BI. It analyzes Netflix movies and TV shows through visualizations, filters, slicers, and drill-through features to understand content distribution by type, country, year added, rating, and genre.

Objective

The project answers the following questions:

- How many total titles, Movies, and TV Shows are available?
- Which countries contribute the highest number of Netflix titles?
- How has Netflix content increased over the years?
- Which ratings and genres are most common?

Tools Used

- Microsoft Power BI
- Microsoft Excel
- Power Query
- DAX
- Data Cleaning and Transformation

Dataset

The dataset contains Netflix title details including Show ID, Type, Title, Director, Cast, Country, Date Added, Release Year, Rating, Duration, Listed In / Genre, and Description.

Data Cleaning Process

The dataset was cleaned using Power Query and Excel.

- Removed duplicate records
- Checked and handled missing values
- Changed incorrect data types
- Created a Year Added column from Date Added
- Cleaned country and genre-related fields
- Prepared the dataset for visualization

Dashboard Features

The dashboard contains KPI cards, interactive visualizations, filters, slicers, and a drill-through page.

KPI Cards

- Total Titles: 8807
- Total Movies: 6131
- Total TV Shows: 2676

Visualizations

- 1 Donut Chart – Content distribution between Movies and TV Shows
- 2 Bar Chart – Top 10 Countries by Netflix Content
- 3 Line Chart – Number of titles added by year
- 4 Bar Chart – Content distribution by genre
- 5 Bar Chart – Content rating distribution

Filters and Slicers

Interactive slicers for Content Type and Rating allow users to filter all visuals.

Drill-Through Feature

A drill-through page named **Country Details** was created. Users can right-click a country in the Top 10 Countries chart and select **Drill Through** → **Country Details** to view details for that country.

Key Insights

- Netflix has more Movies than TV Shows.
- Movies account for the majority of Netflix content.
- The United States has the highest number of Netflix titles.
- Netflix content increased significantly after 2015.
- TV-MA and TV-14 are among the most common ratings.
- Drama, International Movies, and Comedy are popular categories.

Project Structure

```
Netflix-Content-Analysis-Dashboard/  
■■■ Dataset/  
■   ■■■ netflix_titles.csv  
■   ■■■ netflix_titles_cleaned.xlsx  
■■■ Documentation/  
■   ■■■ Netflix_Content_Analysis_Project_Report.pdf  
■■■ dashboard-screenshots/  
■   ■■■ PowerBI_Overview.png  
■   ■■■ Country_details.png  
■■■ Netflix Content Analysis Dashboard.pbix  
■■■ README.md
```

How to Use the Dashboard

- 1 Open the .pbix file in Microsoft Power BI Desktop.
- 2 Use Content Type and Rating slicers to filter content.
- 3 Hover over charts to view detailed values.
- 4 Right-click a country and select Drill Through → Country Details.

Conclusion

This project demonstrates how Power BI transforms raw Netflix data into an interactive dashboard, providing insights into content type, country distribution, ratings, genres, and yearly growth.
